A few of my favorite projects include:

Oregon Health & Science University

Hospital Expansion and Inpatient Tower Addition

To accommodate the increasing demand in inpatient volume and update aging infrastructure, OHSU is expanding existing inpatient bed services with a 14-story building. The building is served by three elevated pedestrian bridges connecting patients and staff to the existing hospital and campus facilities.

LOCATION

Portland, OR

CLIENT

OHSU

SIZE

526,300 sf

SCOPE

Architectural Design /
Environmental Graphic
Design / Interior Design /
Lighting

Yellowhawk Tribal Health Center

Expansion

The new expansion project will add approximately 11,400 sf to the clinic building. The additional space will consist of exam rooms, lab area, waiting room, office space, meeting rooms, and storage. In addition, there will be some remodeling in the administrative office area. There will be some exterior work such as parking area expansion and site improvements.
